0224*						Dry Cr. (6-5-9E)

* See notes next page

*Note

For areas in 5, 6, 7 North and 8, 9, 10, 11 East - several numbering sequences are being left out to accommodate field determination of numberings on irrigation and drainage ditches not identified from the 15' USGS quads available

Local names have been entered where information is available

Note

The area, in Skamania and Klickitat Counties of

T. 5N., R. 8-9-10 E.

T. 6N., R. 8-9-10 E.

is in the Lava Beds area where named streams appear and disappear without direct tributaries but are in drainage area of the White Salmon River from approximately RM 21 to RM 28. Because of many surface vested claims and several water rights recorded in the computer, numbers have been assigned without mileage locations (most of the files are on springs). Demands on the resources will be retrievable through numbers assigned between RM X & Y - although they may not have a direct influence on the river.
