

WRIA 52 was effectively missing from most copies of the Department of Ecology's Columbia River stream catalog code. WRIA 49 streams were accidentally copied and labeled as WRIA 52.

In August 2003, DOE gave us the "true" stream catalog codes for WRIA 52 and still need to capture them electronically.

FYI - it's unlikely that anyone (WDFW or DOE staff) has coded data to DOE's "true" stream catalog codes since the codes were only recorded on paper copies.
